

## Response to comments

1. We have changed the title from **“Data Anonymization for Open Science: A Case Study”** to **“Comparison of Three Anonymization Tools for a Health Fitness Study”**.
2. We have added the Data Usage Agreement (DUA) to the figshare repository where the rest of the paper’s anonymized data resides (<https://doi.org/10.6084/m9.figshare.28041242>).
3. We have updated the first paragraph of the Data Available section to correctly reflect the location of the DUA.

No other changes have been made to the submission.
